

Zachary Parrish

Software Engineer - Java Developer - Web Developer

EXPERIENCE

Noetic Strategies, Inc, Huntsville, AL — *Web Developer*

SECRET Clearance

October 2018 - Present

Full stack web application development for Joint Federated Assurance Center (JFAC). I am responsible for developing the JFAC Portal, which is a knowledge base and ticket submission portal for all services to provide information regarding hardware and software vulnerabilities and defects, as well as issue licenses for code scanning software.

BlueCross BlueShield TN, Chattanooga, TN — *Applications Developer*

May 2015 - August 2018

Full stack application, portlet, and web service development for consumer portals. Used Websphere Portal and Websphere Application Server technologies to deliver these products built in Java and Javascript.

OCV, LLC, Auburn, AL — *Mobile Developer*

Oct 2013 - May 2015

Mostly Android development with minor iOS development and project management responsibilities. Built 20+ apps from the ground up, completely and individually. Layout design and creation, along with app specs, were among my responsibilities.

Marshall Data Systems, Guntersville, AL — *Technician*

Summers 2011 - 2013

Provided technical support over the phone, in shop, or on-site at customer location. Routinely built and supported computer systems for customers that included local government facilities.

EDUCATION

Auburn University, Auburn, AL — *Software Engineering*

August 2011 - May 2015

Bachelors of Engineering in Software Engineering
